

TEKNET™

Centralize Your Security. Simplify Your Operations.

Transform Multiple Intercept® Body Scanners into **One Connected Security Network**

TekNet transforms standalone Intercept scanners into a connected, intelligent security ecosystem by serving as a secure centralized server within your organization's network. It automatically collects, backs up, and organizes scanned images, metadata, reports, event logs, and subject information from every connected scanner, creating a single, reliable source of truth for compliance, investigations, and operational insights.

Whether you operate a county jail, detention center, or a multi-facility correctional system, TekNet gives your team the visibility and control needed to manage security operations with confidence.

One Connected Platform. **Better Visibility. Stronger Security.**

Why TEKNET?

Improve Operational Efficiency and Strengthen Compliance

- ▶ Eliminate duplicate subject manual entry across multiple scanners
- ▶ Automatically synchronize subject annual radiation dosage across all connected Intercept scanners, simplifying ANSI N43.17 compliance reporting
- ▶ Reduce administrative workload and manual processes
- ▶ RAID 6 redundancy and AES ciphers encrypt image data and critical information in transit and at rest

Increase Visibility

Authorized personnel can securely access scan images, subject information, and event records from connected Intercept scanners throughout the facility or at their desk using Intercept Manager.

Key Features:

- ▶ Subject information synchronization
- ▶ Metadata, logs, files and scan backup storage and sharing
- ▶ Compare subject scans and images from other connected Intercepts
- ▶ Centralized scan image storage ranges up to 20 million images
- ▶ Combined automatic annual radiation dose reporting in compliance with ANSI/HPS N43.17*
- ▶ Secure on-premises deployment. All data contained within customer's facilities
- ▶ Jail Management System (JMS) integration capability**
- ▶ Supports Intercept Manager

TEKNET SOLUTION PACKAGES FLEXIBLE OPTIONS TO MEET YOUR NEEDS				
 SPECIFICATION	 Basic	 Standard	 Advanced	 Enterprise
Total Number of Connected Products (Combination of Intercepts & Intercept Managers)	1-10	1-20	1-30	1-200
Installation	Customer*	Customer*	Tek84	Tek84
Scan images storage capacity (maximum # of images)	5.5 million	9 million	17.5 million	TBD
Drive Bays	4	4	4	TBD
Maximum Ethernet Connections	2	4	4	4
Redundant Power	No	No	No	TBD
Rackmount	1RU	1RU	1RU	2RU
Intercept Manager capability	Additional Fee	Additional Fee	Additional Fee	Additional Fee
JMS Integration capability	No	Additional Fee	Additional Fee	Additional Fee

* TekNet Basic & Standard are designed to be self-installed and the Scanner connections self-managed by the customer; Tek84 can optionally perform the TekNet installation for an additional fee.

Correctional Leaders Choose TEKNET

As agencies deploy more Intercept scanners across booking, intake, visitation, and multiple facility sites, centralized data becomes essential. TekNet transforms standalone scanners into a connected security ecosystem – improving operational efficiency, simplifying compliance, protecting critical data.

Centralize your Security Network. **Simplify Compliance. Protect Critical Data.**
